FEYT China-Akupanel

Hebei Feyt New Material Technology Co., LTD

COMPANY PROFILE

Hebei Feyt New Material Technology Co., LTD is a manufacturer of felted polyester products and acoustic products, integrating R&D, production, sales and design. Since established in **1990**

Hebei Feyt New Material Technology Co., LTD is a manufacturer of acoustic products and felt polyester products , integrating R&D, production, sales and design. Since established in 1990, we have grown steadily and become a stable supplier to the European, American and global industry markets. Our head office is located at Shijiazhuang city, the capital of Hebei Province, China. Our factory is in Nangong City, the "felt capital" of China. Factory covering an area of about 8,000 square meters. Our factory has passed the certification of ISO9001:2008BSCI SGS, ISO9001, CE,BV TARGET quality system, and continuously introduced a full set of automated production equipment, equipped with a variety of modern new manufacturing machines. Gathering professional engineering and technical talents, combined with the introduction and application of advanced design concepts to ensure product quality and innovation. We specialize in the design and production of sound-absorbing materials, felt fabric materials, building decoration materials. As FEYT main products, the sound-absorbing and soundproofing products are enjoying a prime reputation in the industry. We have a number of high-tech acoustic patents to support the technology, all the products have various types of domestic inspection reports and various industry certificates.

ABOUT US

FEYT felt polyester acoustic products and sound-absorbing products are widely used in apartments, hotels, theaters, gymnasiums, cultural centers, concert halls, churches, auditoriums, schools, conference rooms, bars, recording studios, multi-purpose halls, studios and other indoor venues with high performance sound-absorption, sound-insulation, noise-reduction, decoration and other multi-purposes.

FEYT always adhere to the core mission of "creating peaceful and beautiful time and space", and has been recognized and supported by many famous decoration companies and clients in the acoustic industry, becoming a stable supplier in both domestic and international markets with stable development and continuous innovation. We welcome friend from all over the world to visit us at any time to experience our professional and high quality products and services!

FEYT felt polyester acoustic products and sound-absorbing products are widely used in apartments, hotels, theaters, gymnasiums, cultural centers, concert halls, churches, auditoriums, schools, conference rooms, bars, recording studios, multi-purpose halls, studios and other indoor venues with high performance sound-absorption, sound-insulation, noise-reduction, decoration and other multi-purposes.

FEYT always adhere to the "quality-oriented, customer first" business tenet, quality-oriented, continuous learning, innovation of product technology and stable growth, as well as timely, honest, careful and efficient product service and continuous development, we strive to step into the industry's leading brands! We will adhere to the corporate philosophy, combine the action with the quality and service, to create a better world for each other!

FEYT RAW MATERIALS

Our expertise in Polyethylene Terephthalate (PET) grew from a desire to create high-design solutions, without sacrificing performance and sustainability. PET, commonly found in water bottles, is recycled into pellets that are then extruded into thin, soft fibers. Layers of these fibers are then pressed together to create a sheet of sound absorbing Sola Felt.

FRIENDLY PROCESSING

Our felt is made from recycled plastic, and all the wood we use comes from sustainable forestry. This ensures that the forest regrows more than what is cut down.

We are proud to say that all our Acoustic Panels are produced in China using sustainable materials.

Our aim is to manufacture high-quality, eco-friendly panels that contribute to a healthier and more sustainable indoor environment.

We believe it's vital to contribute to a sustainable future, which is why our Acoustic Panels are made solely from sustainable materials.

This way, we can guarantee that our Acoustic Panels are not just beneficial for the room they're placed in but also for the environment.

DEVELOPMENT HISTORY

1990

02.16 : Ma's Felt Factory was established with 3 semi-automatic felt raw material production lines to provide felt raw materials for domestic felt product processors.

1999

Increased printing equipment and laser engraving equipment to provide customization service to customers.

2005

Established the third factory, add fully automatic felt acoustic panel production and processing equipment..

2020

Increased the area of the fourth factory, add fully automatic wood strip acoustic panel production and packaging equipment.

1996

The factory's product demand exceeded supply, and a second factory was added with 2 fully automated felt fabric production lines and a felt product sewing shop to provide felt products such as felt bags, felt storage baskets, felt planting bags, dining mats, felt toys and other home furnishings to foreign trade companies.

2001

Increased import and export rights and set up professional foreign trade team to provide quality products and services to overseas customers.

2019

Increased professional design team to provide acoustic panel modeling design and decoration design for domestic and foreign customers..

2023

Established FEYT New Material Co., Ltd, which mainly specialize in sound-absorbing products such as wood slat acoustic panels, felt PET acoustic panels, dividers, ceilings, desktop partitions, etc., occupying an area of 8,000 square meters in the industrial district, and the merging of the third and the fourth factories has entitled the factory more large-scale.

R&D PRODUCTION

For many years, FEYT has been focusing on the training of technical and management talents. At the beginning of the establishment of the company, a special technical research and development department was established.

Relying on the technical support of foreign research and development engineers, it has an experienced and innovative technical research and development team. In recent years, it has cultivated a strong technical R&D and management team, with a large number of skilled employees, which has ensured FEYT leading position in the new material industry.

Since its establishment, the company has focused on industrial cooperation. Not only has it reached a strategic partnership with many industrial suppliers, but also in order to promote the development and production of new acoustic materials, we have established an integrated research mechanism of production, education and research with many national key universities in China. The production design of the products has reached an advanced level.

OWN DESIGN TEAM

EFFICIENT SALES TEAM

SERVICE TEAM

PERFECT QUALITY CONTROL

SERVICE

Customer first service concept
Meet the needs of users for product design, family-oriented marketing and service concepts, and prompt and rapid after-sales response

Quality first production concept
Adhere to the product production tenet that quality is life, continuously strengthen the intelligence of production, strengthen standard operations and improve the quality control system

CERTIFICATION

Management quality advantage:
The company adopts advanced management mode, has obtained quality management system certification, quality etc.

KEEP THE HEART, KEEP FORWARD

Business philosophy: professional innovation, excellent quality, honest service, win-win cooperation.
Quality concept: Quality is produced, not tested. Scientific and technological concept: use technological innovation and intelligent manufacturing to accelerate the transformation of traditional production models
Market philosophy: market value lies in creating customers.
Corporate vision: Based on China.

"serving the world, building a first-class acoustic material manufacturer with cooperation as the cornerstone, quality as the foundation, information as a breakthrough, and talent As the driving force,

technology as the core, not forgetting the original aspiration, seeking fast in stability, and achieving leapfrog development. Be a leader in promoting the development of China's new material industry, let your dreams fly and compete global.

MATERIAL

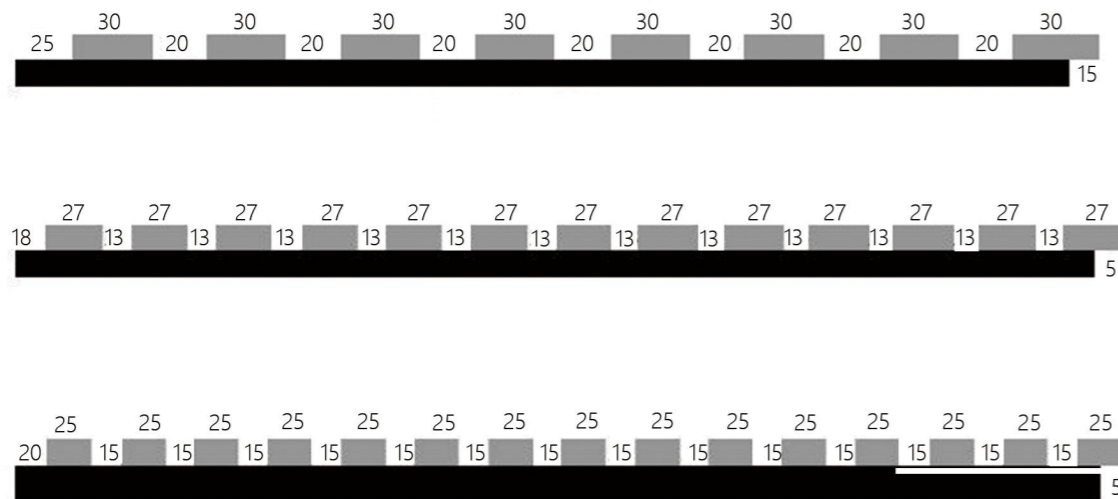

Veneer material optional: natural wood,tech wood,PVC,melamine
MDF board and felt board density and quality can be customized.

CLASSICAL SLAT ACOUSTIC PANELS

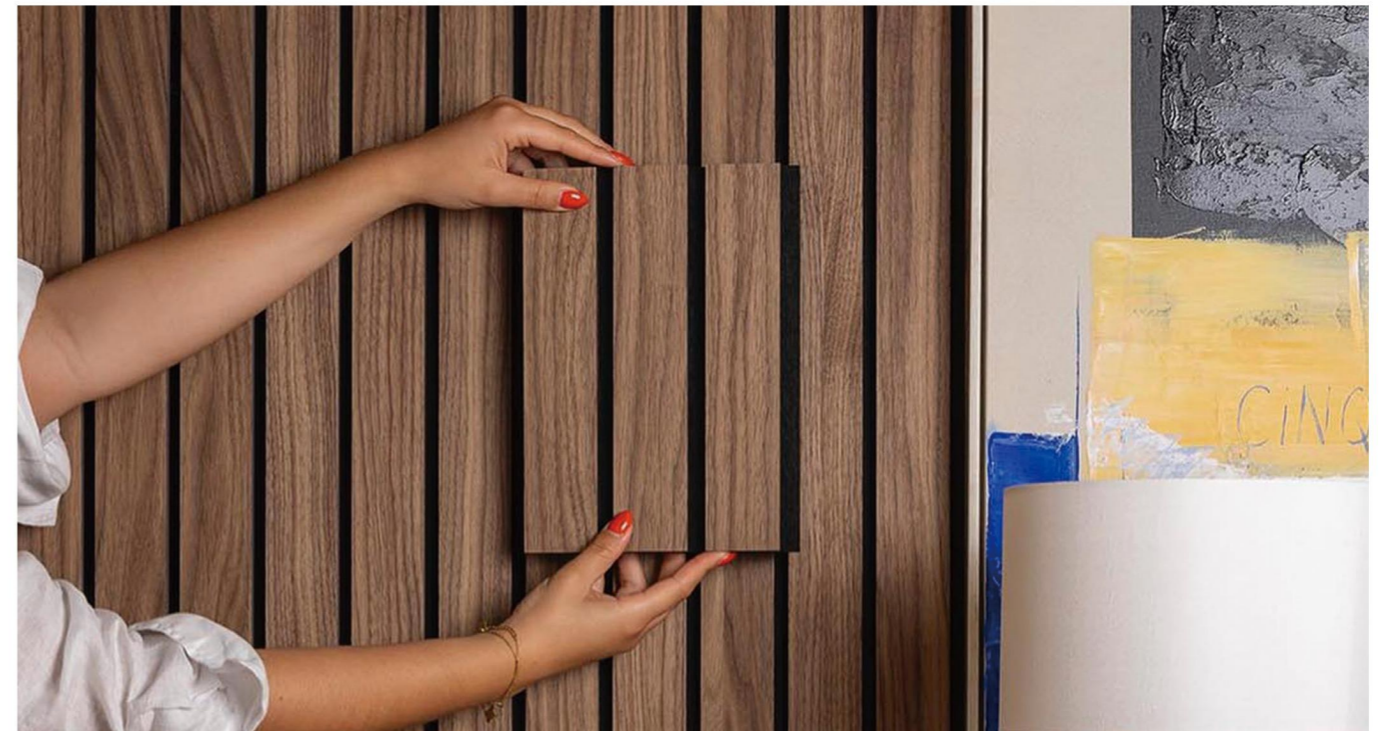

The ultimate and original acoustic slat wood panel.
 Backing felt produced from recycled material.
 Quick and easy installation.
 Superior sound absorption.
 Over 50 years of experience providing luxury wood products.
 Premium wood wall paneling solution.

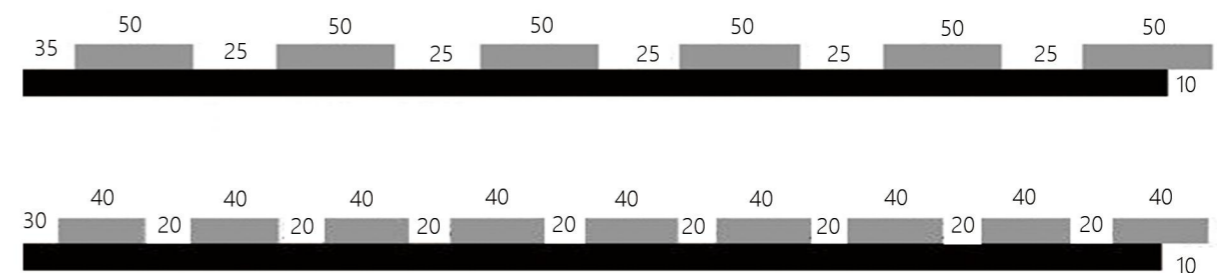

Customizable wood slat widths and gaps

WIDE GRAND SLAT ACOUSTIC PANELS

An enhanced iteration of Nature Wall's signature slatted structure, with wider slats and narrow gaps to add further texture to walls.

The design entails a widened version of their signature slatted wood wall panels, amplifying the visual depth and creating a captivating 3D linear format that's both trendy and timeless. The wider slats and narrowed gaps are more than a mere design choice; they are a calculated endeavor to induce a luxurious vibe, offering a plush look that's bound to elevate the ambiance of any room they adorn.

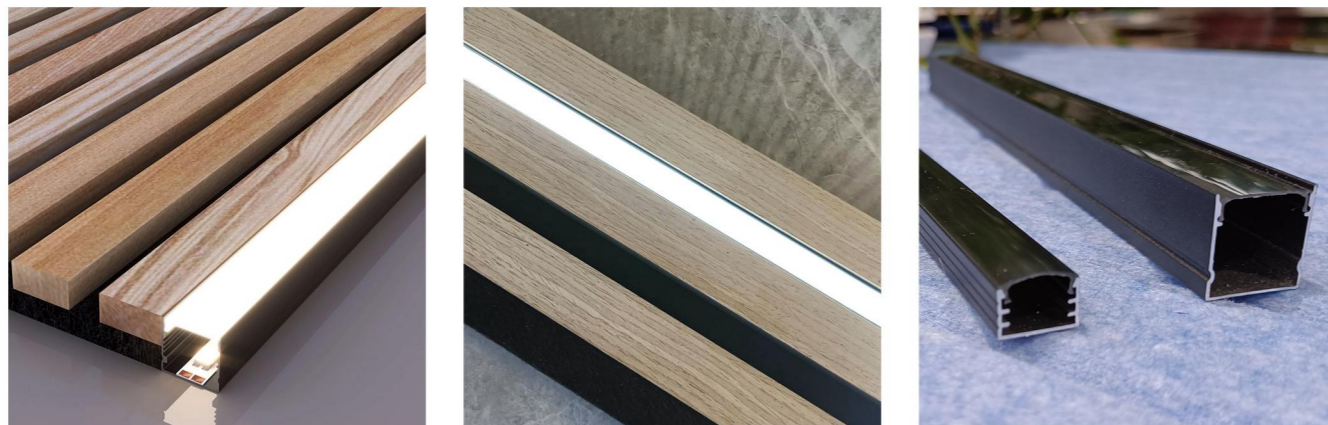

Customizable wood slat widths and gaps

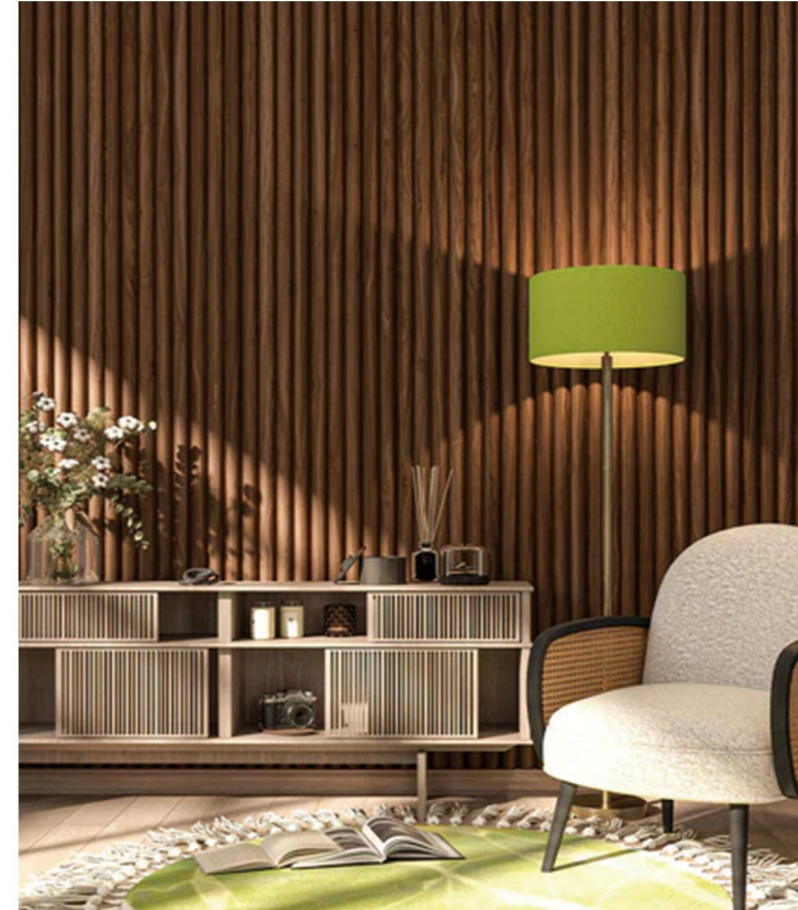

SLAT ACOUSTIC PANELS WITH LED LIGHT

Transform your Edmonton home' s ambience with Feyt China-Akupanel LED-strips, seamlessly integrating into your acoustical wall for an exclusive and captivating expression. Our warm white light brings a cozy and pleasant atmosphere to your favourite room, creating the perfect setting for relaxation and comfort.

ROUND SLAT ACOUSTIC PANEL

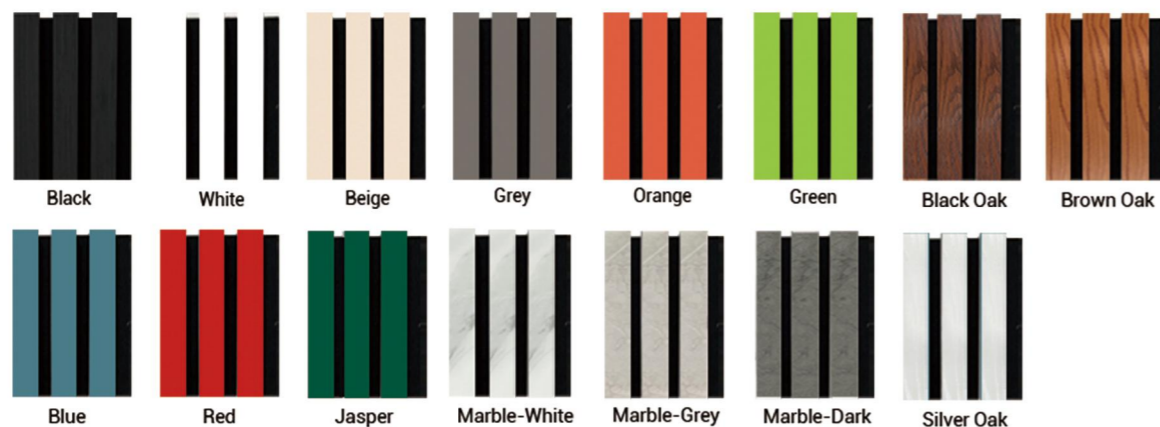

From our line of wooden slat acoustic wall panels, these rounded slat wood wall panels are constructed from polyester acoustic and MDF board, more stylish and luxurious. for a more pronounced 3D slat effect that adds texture and depth to a room.

PVC SLAT ACOUSTIC PANELS

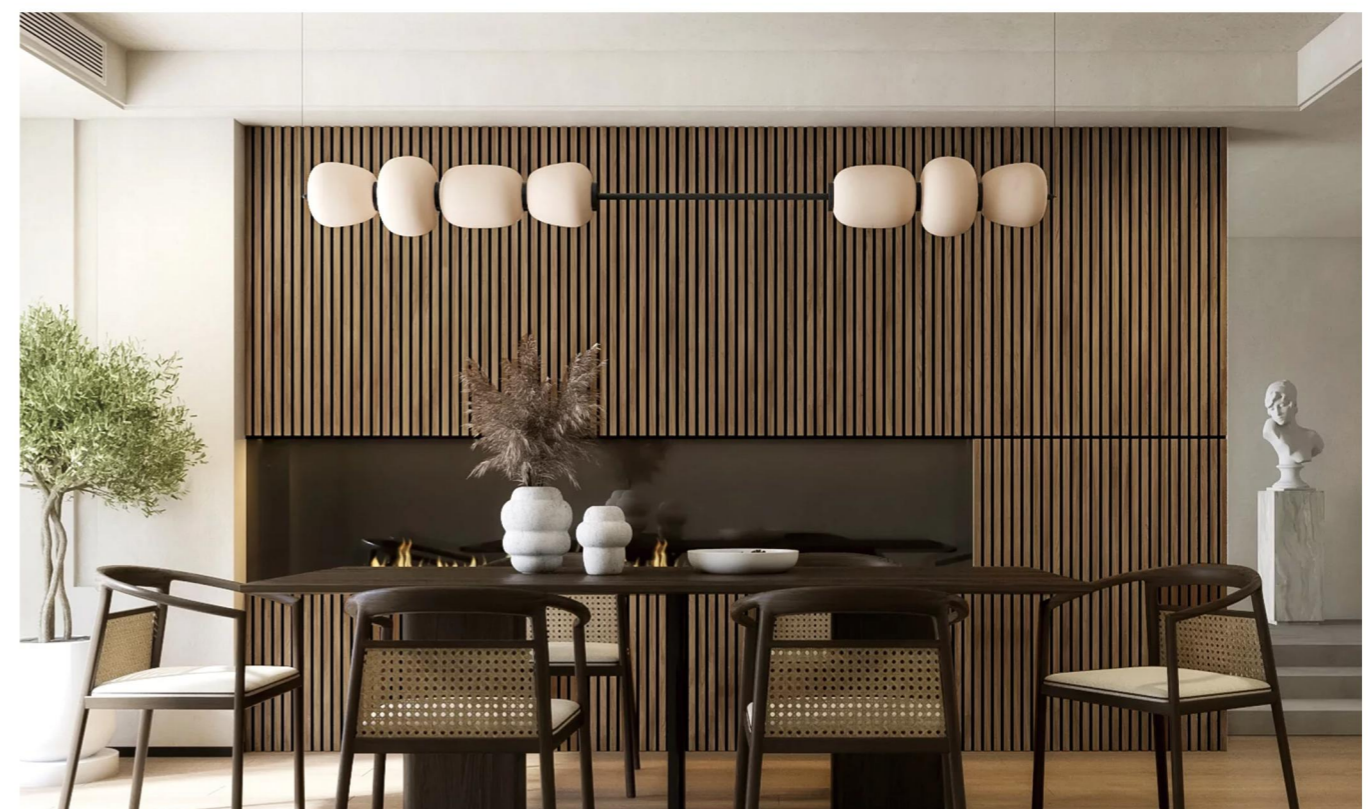

The PVC acoustic slat colour wall panel range is a beautifully designed decorative wall and ceiling panel which boasts high-quality acoustic properties. The panels can be easily applied to both walls and ceilings. The colour range is produced with a luxury quality, smooth laminate finish. Lamella strips with a clean, modern appearance are mounted onto a uniquely designed, recycled acoustic felt material. Fast and simple installation allows you to quickly transform any space.

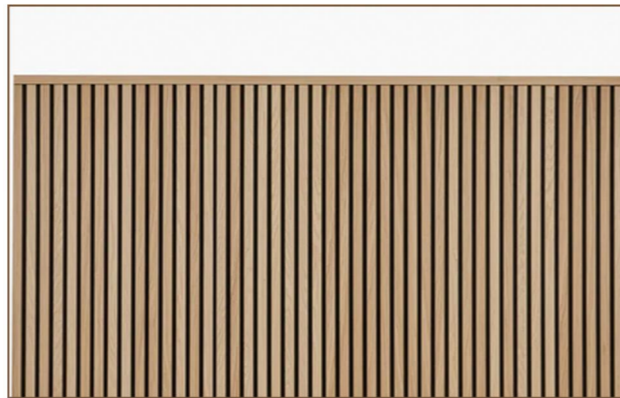

3-SIDES VENEER SLAT ACOUSTIC PANELS

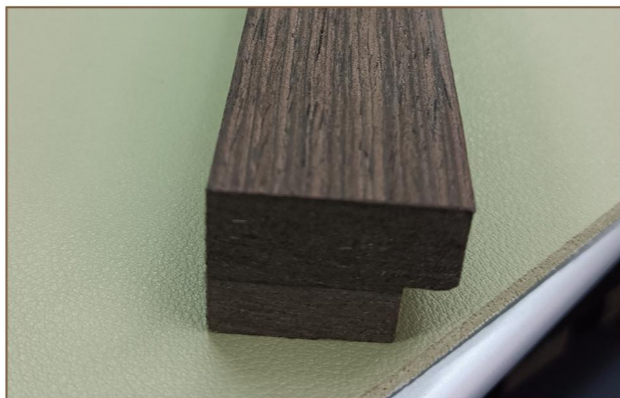

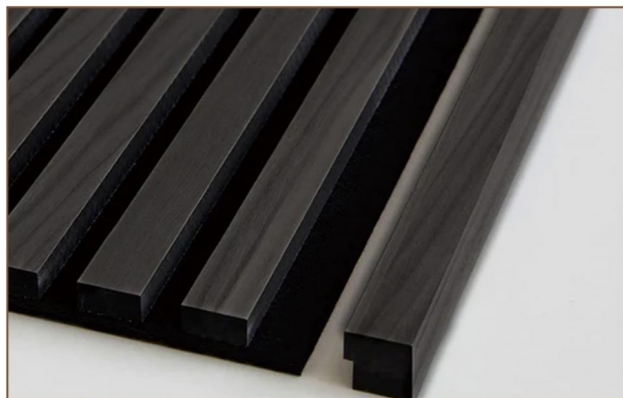

The veneer in our lamellas is wrapped around on each side, unlike cheaper solutions available on the market, in which it is either not visible on the sides or sides they are glued from another piece of veneer so you can see the veneer joints at the corners of the lamellas.

PET FELT ACOUSTIC PANELS

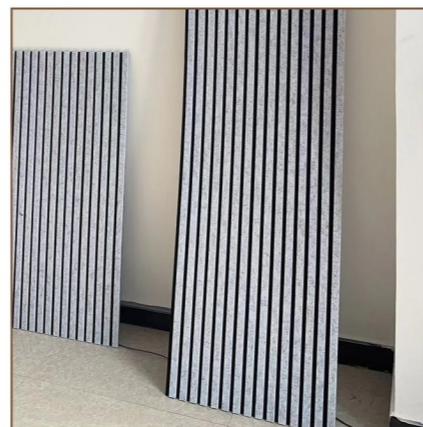

PET FELT ACOUSTIC PANELS

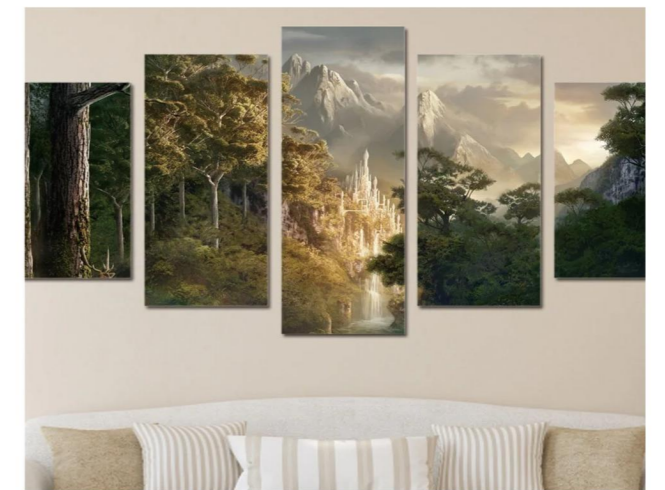

As a porous sound absorbing material, it contains lots of pores, channels, and voids connected to the outside air.

When sound hits it, air flow would be caused in the pores/channels/voids. Then sound energy is lost to heat through friction between the vibrating air molecules and the walls of the pores/channels/voids.

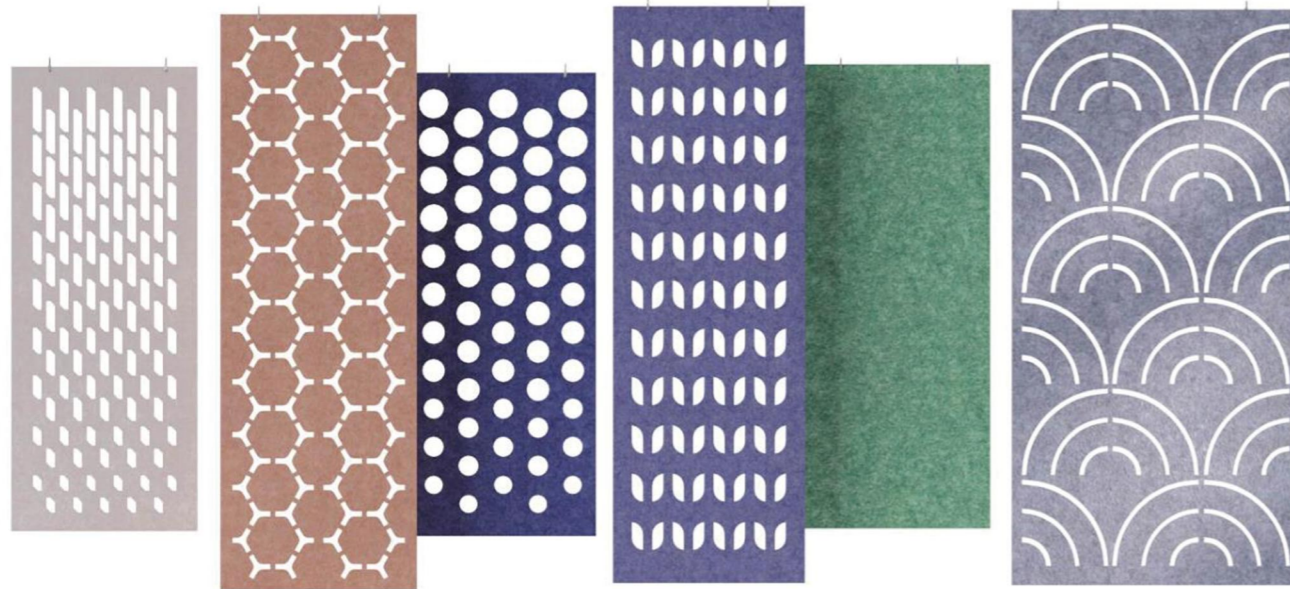

Its can reach 0.77 for average absorption coefficient and 0.87 for NRC, making it an excellent sound absorption supplement for sound diffusers, bass traps, mass loaded vinyl, etc.

Every FEYT China-akupanel design is 100% customizable: With these simple panels, you have endless design opportunities to improve acoustics. Not only do they come in 48 different colours, make it bigger or smaller, change colors or patterns, even the printed pattern. and they can also be cut into different shapes and customised entirely to your preferences.

FELT OFFICE DIVIDER

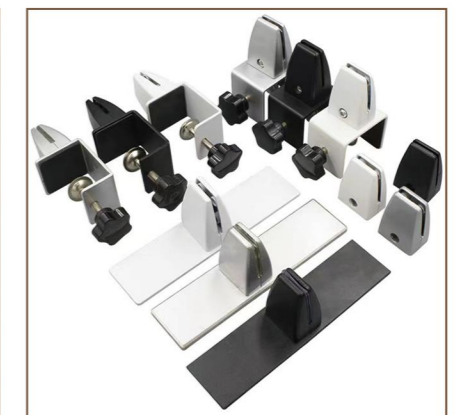

Our FEYT ROOM DIVIDER is a sound absorber of a very special kind, because in addition to delivering effective sound-conditioning, it provides increased privacy for your employees and allow you to freshen up all types of rooms with the latest trend colors.

Our FEYT ROOM DIVIDER score with a very good sound-absorption capacity and can be flexibly deployed wherever you need to reduce the noise level. The easy-to-assemble acoustic partitions blend harmoniously into the office architecture and create pleasant acoustic conditions for concentrated work.

DIVIDER ACCESSORIES

The optional high-quality accessory support feet FEYT FIX Base (not included in the scope of delivery) make assembly and installation of the acoustic partition FEYT ROOM DIVIDER absolutely easy.

FELT ACOUSTIC CEILING

Felt Ceilings - Excellent Acoustics, Soft Visuals

Add amazing topography to your ceiling with FEYT brand Open Cell kits, or easily install Acoustical Panels as a quick retrofit solution in your exposed structure space.

Felt ceiling systems are light weight, meeting the most stringent industry sustainability standards today.

Let us help you bring down the noise with felt ceilings.
